### The Principles of Agile Management

The Agile manifesto highlights four key values:

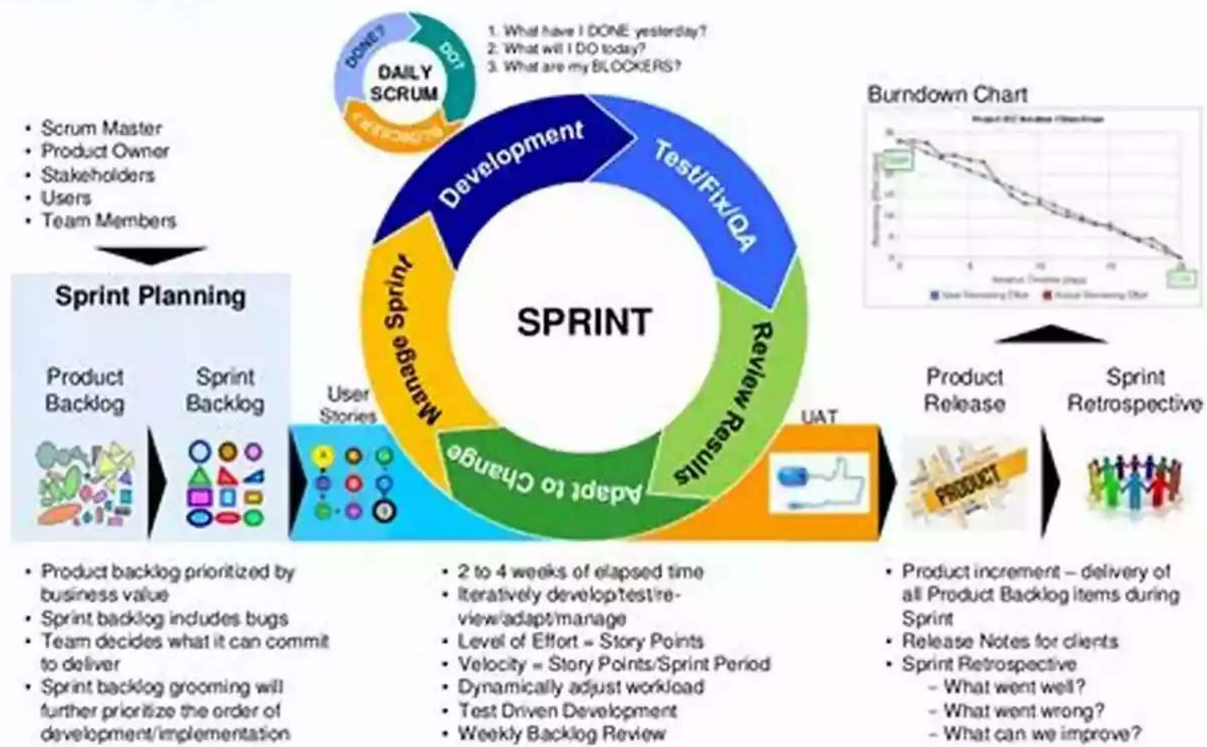

- **Individuals and interactions** over processes and tools
- **Working software** over comprehensive documentation
- **Customer collaboration** over contract negotiation
- **Responding to change** over following a plan

These principles prioritize people, continuous improvement, and adaptability, fostering collaboration and innovative problem-solving.

### The Agile Management Framework

One of the most popular frameworks used in Agile Management is Scrum. Scrum divides projects into small, manageable sprints, ensuring frequent communication, quick decision-making, and continuous improvement.

## Agile Methodology Scrum Process

Scrum teams consist of a Product Owner, Scrum Master, and Development Team. The Product Owner determines project requirements and priorities, the Scrum Master ensures adherence to Agile principles, and the Development Team works together to deliver high-quality increments regularly.
