## Practice Questions and Answers

To help you in your journey towards PtcB Exam success, we have compiled a comprehensive list of practice questions and answers. Dive into each question, carefully study the choices, and select the most appropriate answer. After you have made your decision, compare your response to the provided answer and explanation.

### 1. What is the correct order of the prescription filling process?

- a) Prescription drop-off, prescription entry, prescription filling, prescription verification
- b) Prescription verification, prescription entry, prescription filling, prescription drop-off
- c) Prescription entry, prescription drop-off, prescription filling, prescription verification
- d) Prescription drop-off, prescription filling, prescription entry, prescription verification

**Answer:** a) Prescription drop-off, prescription entry, prescription filling, prescription verification

**Explanation:** The correct order of the prescription filling process starts with the patient dropping off their prescription. Next, the prescription details are entered into the system. Then, the prescription is filled accurately, followed by the verification process.

**2. Which of the following is NOT a controlled substance schedule?**

- a) Schedule I
- b) Schedule II
- c) Schedule IV
- d) Schedule V

**Answer:** c) Schedule IV

**Explanation:** Controlled substances are categorized into five schedules based on their potential for abuse and medical use. Schedule IV substances have a lower potential for abuse compared to those in Schedule I, II, and III.

**3. What is the correct dosage calculation for a patient who needs 500mg of medication, and the available medication concentration is 250mg/5ml?**

- a) 2.5ml
- b) 5ml
- c) 7.5ml
- d) 10ml

**Answer:** b) 5ml

**Explanation:** To calculate the dosage, divide the required medication amount by the available concentration. In this case,  $500\text{mg} \div 250\text{mg}/5\text{ml} = 10\text{ml}$ . Therefore, the correct dosage is 5ml.
