

Second IFIP International Cross Domain Conference IFIPIOT 2019 Tampa FL, USA: Bridging the Gap Between Different Domains

In today's interconnected world, the need for collaboration and knowledge exchange between different domains is more important than ever. In order to address this growing need, the International Federation for Information Processing (IFIP) is organizing the Second IFIP International Cross Domain Conference IFIPIOT 2019 in Tampa, Florida, USA. This conference aims to bring together experts from various fields to discuss and address the challenges and opportunities presented by cross-domain collaboration in the context of the Internet of Things (IoT).

With the rapid advancement of technology and the proliferation of interconnected devices, the IoT has become a reality that is impacting every aspect of our lives. From smart homes to industrial automation, the IoT holds tremendous potential for enhancing efficiency, productivity and convenience. However, realizing this potential requires collaboration and integration of knowledge from multiple domains such as computer science, engineering, social sciences, and business.

The Second IFIP International Cross Domain Conference IFIPIOT 2019 provides a unique platform for researchers, practitioners, and industry experts to come together and exchange ideas, research findings, and experiences related to the IoT and its impact on various domains. The conference will feature keynote speeches by renowned experts, technical sessions, panel discussions, and interactive workshops.

Internet of Things. A Confluence of Many Disciplines: Second IFIP International Cross-Domain Conference, IFIPIoT 2019, Tampa, FL, USA, October 31 – November ... and Communication Technology Book 574)

Topics of Interest

The conference will cover a wide range of topics related to the IoT and its impact on different domains. Some of the key areas of interest include:

- IoT architecture and protocols
- Data analytics and visualization
- Security and privacy in the IoT
- Smart cities and urban planning
- Healthcare and assistive technologies
- Smart agriculture and environmental monitoring
- Industrial automation and robotics
- Human-computer interaction

These topics reflect the multidisciplinary nature of the IoT and the need for collaboration between different domains to address its challenges and leverage its potential.

About IFIP

The International Federation for Information Processing (IFIP) is a leading global organization that brings together researchers, practitioners, and industry experts from various domains to promote collaboration, exchange of knowledge, and advancement of information and communication technologies. IFIP has been organizing conferences and events worldwide to facilitate networking, learning, and research in various areas of computer science and technology.

Conference Venue and Dates

The Second IFIP International Cross Domain Conference IFIPIOT 2019 will take place in Tampa, Florida, USA. The conference will be held from October 14th to October 16th, 2019. Tampa is a vibrant city known for its rich cultural heritage, beautiful beaches, and thriving technology sector. The conference venue offers state-of-the-art facilities and a conducive environment for learning, networking, and collaboration.

Participation and Benefits

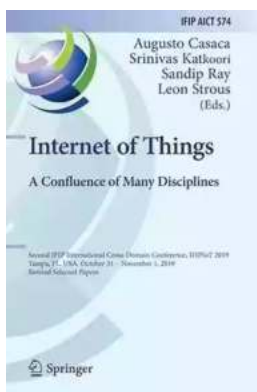

The conference welcomes researchers, practitioners, industry experts, and students to participate and contribute to the discussions and knowledge exchange. By attending the conference, participants will have the opportunity to:

- Gain insights into the latest trends and developments in the IoT domain
- Present their research findings and receive feedback from experts
- Network with peers and establish collaborations

- Learn from keynote speeches by renowned experts
- Participate in interactive workshops and gain hands-on experience

Moreover, the conference provides a platform for participants to showcase their work and contribute to the advancement of knowledge in the field of IoT and its impact on different domains.

The Second IFIP International Cross Domain Conference IFIPIOT 2019 in Tampa, Florida, USA, is a unique opportunity for researchers, practitioners, and industry experts to come together and bridge the gap between different domains in the context of the IoT. By fostering collaboration and knowledge exchange, the conference aims to facilitate the development and implementation of innovative solutions that address the challenges and leverage the opportunities presented by the IoT. Whether you are a researcher, a practitioner, or an industry expert, this conference offers a platform to learn, share, and contribute to the advancement of the IoT and its impact on various domains. So mark your calendars and join us in inspiring new ideas and driving meaningful change!
