This is a special Kindle edition of the famous Arban's Complete Conservatory Method for Cornet or Trumpet. Our six-part edition for the Kindle has the most essential studies from the first six major sections of the original complete edition. Most teachers will choose the exercises we have included since many others are very similar to other nearby studies.

Each exercise has been freshly notated (not scanned from the original book) and formatted to fit on the Kindle screen and be very legible. Some longer studies flow from one page to the next. We have inserted the original page numbers so teachers can easily search for the page they are familiar with, such as lip slurs from page 42. All together, we have included about half of the original studies.

Part 2 includes studies on Syncopation, Rhythms, and Slurring. The studies on syncopation and rhythmic figures will help to develop a precise sense of rhythmic timing and a strong, clear single tongue. The studies on slurring are essential for developing a lyrical and flexible style. Many players will use some of these rhythm and slurring studies as part of their daily warm-up.
